

**Department of Electrical,
Computer, & Biomedical Engineering**
Faculty of Engineering & Architectural Science

Course Title:	Real-Time Computer Control System
Course Number:	ELE709
Semester/Year (e.g.F2016)	W2025

Instructor:	Mohamed Shabab
--------------------	----------------

<i>Assignment/Lab Number:</i>	Project
<i>Assignment/Lab Title:</i>	PID Controller

<i>Submission Date:</i>	April 7, 2025
<i>Due Date:</i>	April 7, 2025

Student LAST Name	Student FIRST Name	Student Number	Section	Signature*
Minhas	Krisham	501031195	03	KM

Anti PID with Load

Anti PID without Load

6. The graphs are mostly the same with one discrepancy at the peaks of the wave. There is some noise at the peaks of the graph of the Anti PID with the load, this is because of the load generated on the micro controller which is taking resources away from the Anti PID controller's processing.
